

Qualifications

- ◆ Fellow of the American Institute of Chemists (FAIC)
- ◆ Member of ASTM Committees including:
 - Sampling and Analysis of Atmospheres
 - Waste Management
 - Molecular Spectroscopy and Chromatography
 - Occupational Health and Safety
- ◆ Member of the American Chemical Society
- ◆ Member of the International Society of Environmental Forensics
- ◆ Associate Member of the American Bar Association (ABA) - Section of Environment, Energy & Resources
- ◆ Member American Association for the Advancement of Science
- ◆ Member Air & Waste Management Association (AWMA)

Experience

- ◆ Facility Manager & Technical Director, Systech Corp.
- ◆ Marketing Manager & Manager of Business Development, McKesson Envirosystems
- ◆ Manager Cement Kiln Services, Safety-Kleen Corp.

GCI has the technical background and the needed communication skills to explain not only the science behind *what* happened, but also the scientific expertise and real life operational experience to develop the evidence that clearly shows *why* it happened.

If you have questions or wish to set up a meeting, please contact David Gossman at (563) 652-2822 or send an e-mail to dgossman@gcisolutions.com.

Looking for Technical Assistance in Litigation Proceedings?

Incidents that prompt litigation do not just happen, they occur as the result of a string of decisions that can date back to the initial facility design. Incidents routinely occur as a result of poorly designed or executed maintenance procedures including:

- ◆ Hiring and training practices
- ◆ Laboratory methods
- ◆ Sales and marketing strategies
- ◆ Ambiguous or conflicting regulations

Proper analysis of these potential causes requires both technical and operational expertise.

GCI provides the technical expertise and develops the evidentiary basis for legal arguments relying on or involving:

- ◆ Industrial and environmental chemical forensic analysis
- ◆ Prevention of chemical spills and/or proper management of historical environmental contamination

- ◆ Causation proved by fate and transport of chemicals and their degradation products in the environment.
- ◆ Safety and prevention of catastrophic events at industrial facilities such as fires and explosions
- ◆ Appropriate standard of care for management of hazardous waste and hazardous materials
- ◆ Regulatory compliance
- ◆ Prevention of injury or chemical exposure resulting from hazardous materials or hazardous materials operations

Education

David Gossman's academic background includes a BS and MS in Interdisciplinary Physical Science. His graduate program focused on Analytical Chemistry, Geophysics and Science Communication. He has extensive industrial and laboratory experience and an expert support staff.

David Gossman continues to maintain hands-on involvement as owner and QA/QC Manager for ChemRight Laboratories, Inc.
